

## ■ Domestic Greenhouse Gas Emissions

(단위 : tCO<sub>2</sub>e)

Category	2022	2023	2024
Direct emissions (Scope 1)	27,090	28,425	29,100
Substitute emissions (Scope 2)	40,613	42,983	44,975
Total	67,703	71,408	74,067
Unit (tCO <sub>2</sub> e/ton of product)	0.73	0.72	0.72
Other Indirect Emissions (Scope 3)	–	6,717	–

※ Domestic Greenhouse Gas Emissions Scope:

Includes all domestic sites (headquarters, factories, sales offices, logistics centers, etc.) based on Scope 1/2.

※ Domestic data has been third-party verified according to the emissions trading system,  
while overseas data is in a limited verification state.

Full disclosure of emissions data for overseas operations will follow after reasonable verification is completed

※ Third-party verification for Scope 3 data is being progressively expanded.

In 2023, verification was conducted for Category 3 (Fuel- and Energy-Related Activities).

In 2024, verification is underway for Categories 2, 3, 4, and 15 (Capital Goods, Energy, Waste, Investments),  
with completion scheduled for September 2025.
